ABSTRACT

This report presents statistical pictures of Illinois Public Libraries during the fiscal year 1988-1989. The information comes primarily from the Illinois Public Library Annual Report forms. In addition, text has been included that describes how a library or library system can utilize these statistics. Three sections divide the publication. Section I presents facts about Illinois public library operations, use, resources, and finances. Section II describes statistical averages and percentiles for libraries which provide direct service and which serve populations of different sizes. Selected aspects of library operations are listed for individual libraries, and are provided in summary form for each population group. Charts highlight trends at the end of this section. Section III describes statistical averages and percentiles for libraries providing direct service with membership in one of Illinois' 18 multi-type library systems. Selected aspects of library operation are listed for individual libraries, and are provided in summary form for each library system. Charts that compare the individual systems are included in this section. Concluding the report is a copy of the Illinois Public Library Annual Report form. (MAB)

PREFACE

Illinois Public Library Statistics: A Guide for Librarians and Trustees, 1988-1989, is a composite of the previous **Illinois Public Library Statistics: Analyses** and the statistics listings that appeared annually in issues of **Illinois Libraries**. It pulls together in one place the statistical picture of public libraries in Illinois during the fiscal year of 1988-89. This publication can be used in conjunction with the management profiles that are prepared and distributed to individual public libraries in Illinois.

In addition to basic statistics listings, data elements have been summarized for each of eight population groups and for each library system. Ratios and percentages based on those data elements have been calculated and are presented in tables for each library, population group, and library system.

In an effort to make the publication more useful, we have included additional text that provides more detail on how a library or library system can make use of these statistics. We welcome your comments and suggestions for changes.

The Library Research Center staff would like to thank Kathleen Bloomberg and Stanley Adams of the Illinois State Library who provide advice and assistance throughout the project. Also contributing their expertise are members of the Statistical Services Advisory Committee (Fred Schlipf, John Moorman, John Blegen, Peter McElhinney, Jan Miller, and Thomas Moran) from the public/system library community. This committee meets semi-annually to advise the LRC on content, interpretation, and presentation of data and on the format and usefulness of products produced by the LRC.

This issue was the work of many LRC staff. Leigh Estabrook, Dean of the Graduate School of Library & Information Science, serves as Director of the LRC and provided the necessary environment for successful production of the document. Katy Sherlock as Project Coordinator of the LRC provided leadership integral to the completion of the project while managing the project, overseeing quality control, and analyzing the data. Carol DeVoss coded IPLARs and managed the records, while Pat Boze coded IPLARs and edited reports. Ron Beals, Ann Brennan, Dana Buckner, Pam Conlin, Denise Dallmier, Joe Lihota, Andy Majernik, Doug Morissey, Julie Radway, and Frank Ratkus entered the data into the computer file and spent innumerable hours checking for accuracy. Jennifer Shannon provided the technical support for the project.

INTRODUCTION

Libraries can be understood in many ways--by working in them, by visiting them, and by reading verbal and numerical descriptions of them. Numerical, or statistical, descriptions condense factual information about many aspects of library operations and present the information in a variety of ways, each providing a different view of the total library picture.

This publication, **Illinois Public Library Statistics: A Guide for Librarians and Trustees, 1988-1989**, presents statistical pictures of Illinois Public Libraries during the fiscal year 1988-1989. The information comes primarily from the 1988-89 Illinois Public Library Annual Report forms.

Statistics should be seen by librarians and trustees as tools and not ends in themselves. The value of the statistics published here is that they can be used both internally and externally by the library's administration. Internally, the library's individual statistics can be compared to previous years' statistics as a way to track performance, to assess the success of the library's chosen goals, to set new service and management objectives, or to keep the library headed in its chosen direction. Externally, the library's statistics can be compared to other libraries of similar size and environment to determine whether the library is above or below the average for its system or population group, to justify library actions and budgets, to plan for library service, and to evaluate the library's progress. Throughout this publication, suggestions and explanations are provided for using this statistical information.

STATISTICAL VIEWS OF ILLINOIS PUBLIC LIBRARIES

Three statistical pictures of Illinois public libraries are presented in this publication:

SECTION I: **STATISTICS ABOUT LIBRARY OPERATION**
This section presents facts about library operations for each public library in Illinois, submitting an Illinois Public Library Annual Report for 1988-89, including use, resources, and finances.

SECTION II: **LIBRARIES GROUPED BY SIZE OF POPULATION SERVED**
This section describes statistical averages and percentiles for libraries providing direct service, serving populations of different sizes. Selected aspects of library operation are listed for individual libraries, and provided in summary form for each population group. Trends are highlighted in charts at the end of this section.

SECTION III: **PUBLIC LIBRARIES GROUPED BY SYSTEM**
This section describes statistical averages and percentiles for libraries providing direct service with membership in one of Illinois' 18 multi-type library systems. Selected aspects of library operation are listed for individual libraries, and provided in summary form for each library system. Charts that compare the individual systems are at the end of this section.

MAKING SENSE OF THE STATISTICS

Numerical facts about libraries can represent values for individual libraries, or they can describe in summary form the values for a group of libraries. In this example, the groups are based on the size of population served. The table below, used as an example here and also reproduced in the corresponding section of this issue, provides summaries--averages, percentiles and ranges--of basic statistics for the group of libraries serving populations of from 5,000 to 9,999.

Each type of summary--averages, percentiles, and ranges--provides a slightly different descriptive picture of a group of libraries. By becoming comfortable with the nuances of each summary measure, you will be able to get the most out of these numerical descriptions.

In examining this sample chart, notice that N = the number of cases (libraries) that are included in this analyses. The number of cases may be less than the total of all in a particular group (total libraries in a system or total libraries in a population group). Libraries that do not report statistics or that contract for services will not be included in these analyses.

AVERAGES. The average (also called the mean) of any item is the sum of all the items divided by their number. An average provides a good, general description of an item for a particular group of libraries. For example, looking at volumes held (VOL HELD) in the chart above tells us that, for libraries serving populations of 5,000 to 9,000, the average number of volumes held is 27,290. The "average" probably does not represent any real library, just as no American family has 2.3 children; it is one statistical way of describing the group of libraries. Reading the averages for the other statistics across the chart gives us a good picture of the "average" library serving a population this size.

RANGE: HIGH and LOW. The high score identifies the highest value for that item, and the low score identifies the lowest value. Looking again at volumes held in the chart above, we see that the library holding the most volumes had 96,093 volumes, and the library with the least volumes had 5,886. Looking at both together, the range tells us that there is a great deal of difference between the book collection sizes of libraries in this group. Using the high and low values, you can also get a sense of where your library fits in relation to the top and the bottom of the range.

Range can also give you another descriptive clue about this group of libraries. If the top or the bottom values are quite a bit larger or smaller than the average, you can see that these extreme values will influence the average. Extreme values in either direction can affect the average so that, while still representing the sum of the total divided by the number, the average may not, in fact, be the most representative way to describe these libraries. So, again considering the volumes held, while 27,290 volumes is the average, the presence of a very high value (and also a low value) could affect the average so that we really do not know much about how many libraries have collections around the average figure. In order to know more about how many libraries have collections of various sizes, we need to look at the percentiles.

PERCENTILES: 50TH (MEDIAN), 75TH, 25TH. The 50th percentile, or the median, is the value below which 50% of the libraries fall. Looking at the chart above, we see that 50% of the libraries have collections smaller than 24,374 volumes. That number is almost 3,000 volumes smaller than the average, so, indeed, the collections of the larger libraries did push up the average. The median, as the midpoint of values, is frequently as interesting, or more so, than the average since it helps to place your library's figure in relation to the total number of libraries that have a larger or smaller collection.

The 75th and the 25th percentiles tell you more about how the values are actually distributed through the range. The 75th percentile is the value below which 75% of the libraries have collections smaller than 32,770 volumes, confirming our suspicion that a few larger libraries had skewed the average. We know that most of the library collections (75%) are smaller than 32,770, and we can tell from the 25th percentile that most are larger than 19,378.

So, putting all these summary estimates together, what can we say about library collections in this group of libraries?

> Out of the 89 libraries in this group, we know that half have collections smaller than 24,374 volumes. The largest collection is 96,093 volumes, and the smallest is 5,886 volumes. Fifty percent of the libraries have between 32,770 and 19,378 volumes. And, finally, the average number of volumes held is 27,290.

As you can see, the richness of this description above can be very useful to you in assessing how your library compares with other libraries. Suppose, for example, that your library holds 25,000 volumes. Looking at the average alone, it seems that you are below average. However, you hold more volumes than fifty percent of the libraries in the group, and you are roughly within 10,000 volumes of the number held by 75% of the group, so your position, while below average, is actually better than half the libraries and close to a value that includes a substantial majority.

To make sense of the summary (descriptive) statistics, look at each one--average, high, low, 50th percentile, 75th percentile, 25th percentile--in order to fill in a different piece of the total picture. You may find it helpful, then, to describe the total situation to yourself, much as we did in the example above. And then ask yourself: Based on this total picture, how is MY library doing? Once you have established this, you may use the result to set measurable objectives for the library. For example, your objective might be to increase your library book holdings to 28,000 volumes by the end of the next fiscal year.

The comparison groups here are one source for your library. You may also want to look at comparisons within your system (Section 3). In addition, the Management Profile that each public library receives from the Library Research Center provide other comparison groups based on equalized assessed valuation, operating expenditures and population served. The Management Profile and the Statistics publication combine to provide Illinois Librarians and trustees a wealth of statistics about current public library operations within the state and over a period of several years.

SECTION I: STATISTICS ABOUT LIBRARY OPERATION

Basic statistics for each library are listed in this section, offering the individual view of libraries. The figures in this section are total figures for 1988-89 for each library. These statistics provide the library with basic information on the question "where are we?" This is the baseline information needed by librarians and trustees in planning and managing library services. A library often uses other libraries for comparison. This statistics listing will allow an individual library to review the statistics of the libraries of interest. These comparison libraries may be those serving similarly-sized communities or neighboring libraries.

Data included in the tables in this section are reported on the Illinois Annual Report Forms submitted by 610 (out of a total of 619) public libraries. The tax information is supplied by the Illinois Department of Revenue and is reported for all 619 libraries. An explanation of the footnotes included in the statistics listing is also found in this section, as a service to the reader in interpreting the anomalies found in certain annual reports. The cross-reference listing is included to connect the legal name of libraries with their corresponding location. For the statistics listing, libraries are listed alphabetically in order by location, with the legal name used as a subheading. Tables 1.3 - 1.5 are included in this section (and also appear as Tables A and C in Sections 2 and 3) for easier comparison between systems and population groups.

The variables for which statistics are computed are defined in the section which follows. The title of the variable is listed in boldface, with the corresponding definition following the title.

DEFINITIONS

These definitions are for variables included in the statistics listing in Section I. The source for these statistics, unless otherwise indicated, is the 1988-89 Illinois Public Library Annual Report form (IPLAR). Other sources of data include the 1980 Census (CENSUS), the 1987 Illinois Department of Revenue tax information tape (TAPE), and the Illinois State Library (ISL). The definitions are listed in the order of appearance in the table.

POPULATION SERVED: The population according to the 1980 (or later special) Census for all but district libraries. The latter provided population figures for their service areas. (ISL, CENSUS)

NONRESIDENT FEE: The nonresident fee shown is the fee charged per family per year for use of the library. Exceptions are indicated by a footnote.

HOURS OPEN PER WEEK: The number of hours the central library was open during a typical week in October 1988.

TOTAL TRANSACTIONS: The total direct circulation of all materials to library users. This figure includes both interlibrary loans received from other libraries and reciprocal borrowing.

TOTAL STAFF IN FTE: Full-Time Equivalence is figured on the basis of a 40-hour week. Included in this figure are professional staff, technical and clerical employees, and pages. Excluded from this figure are maintenance staff, persons not paid by the library, and vacant positions.

BOOK STOCK ADDED: Total number of book volumes added.

BOOK STOCK HELD: Total number of book volumes held at the end of the year.

FILMS: Included in this figure are 8mm and 16mm motion picture films, videotapes, videocassettes, and videodiscs.

RECORDINGS: Included in this figure are phonrecords, tapes, cassettes, compact disks, etc.

PERIODICAL TITLES CURRENTLY RECEIVED: Number of periodical titles currently received.

EQUALIZED ASSESSED VALUATION: Equalized assessed valuation is the figure of real property reported in thousands of dollars. Information is taken from the abstracts on file with the Illinois Department of Revenue for the 1987 assessment year. For public libraries whose service area is in more than one county, a separate assessment and tax rate is shown for each county. (TAPE)

TAX RATE: The tax rate reported for all types of libraries is for general library use only and may not include rates levied by libraries for a variety of special purposes (e.g., social security or workers' compensation). Tax rates should be interpreted as follows: a tax rate of 0.12 is equal to 12 cents per $100 of assessed valuation. Information is taken from the abstracts on file with the Illinois Department of Revenue for the 1987 assessment year. (TAPE)

LOCAL GOVERNMENT RECEIPTS: The amount of revenue received by the library from local government sources during the fiscal year. This amount does not include a working balance from the previous year, income from tax anticipation warrants, revenue sharing, proceeds of a bond issue, or the monetary value of services provided free by the local government (e.g., audit tax, social security tax, and working cash fund tax). This figure includes income for the year in which the money is received.

TOTAL RECEIPTS: The total amount of money received by the library from all sources during the fiscal year, including state aid, revenue sharing, receipts for capital expenditures, gifts, etc. This does not include the working balance from the previous year, income from tax anticipation warrants, or the monetary value of services provided by the local government. Excluded from this figure is income (e.g., endowment monies) given directly to the Friends of the Library group instead of the library.

EXPENDITURES FOR WAGES AND SALARIES: Included in this figure are wages and salaries paid to all staff except maintenance personnel and fringe benefits such as the library's contribution for insurance, social security, and the Illinois Municipal Retirement Fund.

PRINT EXPENDITURES: Expenditures for books, periodicals, microforms, and other printed materials.

AUDIOVISUAL EXPENDITURES: Expenditures for audiovisual and all other non-print materials.

TOTAL OPERATING EXPENDITURES: Expenditures for wages, salaries, and fringe benefits for all employees, for library materials, for supplies, for binding and rebinding, for plant operation and maintenance, and for all other current operating costs.

TOTAL EXPENDITURES: Total operating expenditures plus capital outlay (for sites, buildings, construction or remodeling, and purchase of vehicles and other major fixed assets) and debt retirement.

FOOTNOTES

Footnotes to the data file are chosen primarily on the basis of a library's self-reported anomalies. By grouping the footnotes into categories and listing those libraries reporting similar information under each heading, it should be easier to retrieve the information for a specific library.

The libraries are listed by location, and then by legal name of library if there is more than one library located in that city. The location listing is determined by the mailing address of the library.

RECORD OF TAXES LEVIED BY ILLINOIS PUBLIC LIBRARIES

The following tax table is derived from a 1987 tax tape provided by the Illinois Department of Revenue. In this listing, tax information is included for all libraries, not just district libraries. The table lists the location of each library, the county codes, the assessed valuations in 1,000's of dollars, the tax code, and the tax rate for each library. For district libraries, this information is shown separately for each county served in part by each library district.

The tax codes, 1-17, are listed below:

Tax Codes

1=Corporate Tax

2=Bond and Interest

3=Building

4=IMRF

5=Audit

6=Liability Insurance

7=Social Security

8=Worker's Compensation

9=Building and Equipment

10=Working Cash Fund

11=Unemployment Insurance

12=Construction and Maintenance

13=Land and Building Acquisition

14=Prior Year Adjustment

15=Special Levy

16=Operation and Maintenance

17=Library Tax

SECTION 2: PUBLIC LIBRARIES GROUPED BY SIZE OF POPULATION SERVED

This section examines public libraries by population, a common comparison group for individual libraries. In the tables that follow, libraries are grouped by the size of population served. The eight population groups are:

Under 1,500
1,500 to 3,000
3,000 to 5,000
5,000 to 10,000
10,000 to 25,000
25,000 to 50,000
50,000 to 75,000
75,000 to 250,000

For each population group, there are three tables:

A. Averages and Percentiles of Statistics of Public Libraries Serving a Selected Population Group
B. Ratios and Percentages Derived from Statistics of Public Libraries Serving a Selected Population Group
C. Ratios and Percentages Derived from Statistics of Public Libraries Serving a Selected Population Group

The statistics presented in Table A for each population group are derived from the data in Section 1. Tables B and C make extensive use of ratios and percentages. Ratios combine two of the basic statistics, such as the number of circulation transactions per capita. A library might have 10.4 circulation transactions per person, based on population served. Percentages look at one statistic as a percentage of another, such as adult circulation as a percentage of total circulation. A library may have an adult circulation that accounts for 62% of total circulation.

The charts provide a visual comparison of selected items across the different population groupings. Comparisons among different population groups can suggest general trends as well as differences among the various population groupings. In addition to the charts given here, figures from the summaries of basic statistics tables and the summaries of ratios and percentages tables can used for comparison among the population groupings.

DEFINITIONS

The following data are provided in summary form (Table A) for each population group. The source of the data, unless otherwise indicated, is the 1988-89 Illinois Public Library Annual Report form. Other sources of data include the 1980 Census (CENSUS), the 1987 Illinois Department of Revenue tax information tape (TAPE), and the Illinois State Library (ISL). Variable definitions are listed in the order of appearance in the table.

POPULATION SERVED: The population according to the 1980 (or later special) Census for all but district libraries. The latter provided population figures for their service areas. (CENSUS, ISL)

NONRESIDENT FEE: The nonresident fee shown is the fee charged per family per year for use of the library. Exceptions are indicated by a footnote.

HOURS OPEN PER WEEK: The number of hours the central library was open during a typical week in October 1988.

TOTAL TRANSACTIONS: The total direct circulation of all materials to library users. This figure includes both interlibrary loans received from other libraries and reciprocal borrowing.

TOTAL STAFF IN FTE: Full-Time Equivalence is figured on the basis of a 40-hour week. Included in this figure are professional staff, technical and clerical employees, and pages. Excluded from this figure are maintenance staff, persons not paid by the library, and vacant positions.

BOOK STOCK ADDED: Total number of book volumes added.

BOOK STOCK HELD: Total number of book volumes held at the end of the year.

PERIODICAL TITLES CURRENTLY RECEIVED: Number of periodical titles currently received.

EQUALIZED ACCESSED VALUATION: Equalized assessed valuation is the figure of real property reported in thousands of dollars. Information is taken from the abstracts on file with the Illinois Department of Revenue for the 1987 assessment year. For public libraries whose service area is in more than one county, a separate assessment and tax rate is shown for each county. (TAPE)

LOCAL GOVERNMENT RECEIPTS: The amount of revenue received by the library from local government sources during the fiscal year. This amount does not include a working balance from the previous year, income from tax anticipation warrants, revenue sharing, proceeds of a bond issue, or the monetary value of services provided free by the local government (e.g., audit tax, social security tax, and working cash fund tax). This figure includes income for the year in which the money is received.

TOTAL RECEIPTS: The total amount of money received by the library from all sources during the fiscal year, including state aid, revenue sharing, receipts for capital expenditures, gifts, etc. This does not include the working balance from the previous year, income from tax anticipation warrants, or the monetary value of services provided by the local government. Excluded from this figure is income (e.g., endowment monies) given directly to the Friends of the Library group instead of the library.

EXPENDITURES FOR WAGES AND SALARIES: Included in this figure are wages and salaries paid to all staff except maintenance personnel and fringe benefits such as the library's contribution for insurance, social security, and the Illinois Municipal Retirement Fund.

LIBRARY MATERIALS EXPENDITURES: Expenditures for all library materials.

OTHER OPERATING EXPENDITURES: Operating expenditures, other than expenditures for wages and library materials, as a percentage of total operating expenditures. This includes wages and fringe benefits for building maintenance staff, capital outlay, and other miscellaneous expenses.

TOTAL EXPENDITURES: Total operating expenditures plus capital outlay (for sites, buildings, construction or remodeling, and purchase of vehicles and other major fixed assets) and debt retirement.

The following list of definitions includes the variables listed in Table B and C for all population groups. The source of the data unless otherwise indicated, is the 1988-89 Illinois Public Library Annual Report form. Variable definitions are listed in the order of appearance in the table.

TRAN PER FTE: Transactions per paid full-time equivalent staff. The number of circulation transactions per paid, full-time equivalent staff, excluding building maintenance staff, based on a 40-hour work week.

TRAN PER CAP: Transactions per capita. The number of circulation transactions per capita for the population served. (CENSUS, ISL)

TRAN PER ITEM HELD: Transactions per item held. The number of circulation transactions per item in the collection, including books, films, video materials and audio recordings.

TRAN PER HOUR OPEN: Transactions per hour open. The number of circulation transactions per hour the central library was open. This is found by dividing the total number of circulation transactions for the year by 52 times the number of hours open during a typical week in October 1987.

% ADULT TRAN: Percentage of adult transactions. This is the circulation of adult materials as a percentage of the total circulation.

FTE PER 1000 POP: Full-time equivalent per 1,000 population. The number of full-time equivalent staff, excluding building maintenance staff, per 1,000 population. Libraries with all-volunteer staffs are included in figuring system and population group averages. (CENSUS, ISL)

MLS % OF TOTAL STAFF: Master's in library science percentage of total staff. Hours per week worked by staff holding a library degree at the master's level as a percentage of total FTE hours per week, not including building maintenance staff.

VOLS ADDED PER CAP: Volumes added per capita. The number of book volumes added per capita. (CENSUS, ISL)

VOLS HELD PER CAP: Volumes held per capita. The number of book volumes held per capita. (CENSUS, ISL)

% VOLS ADDED: Percentage of volumes added. The number of book volumes added as a percentage of the number of book volumes held at the end of the year.

ASSD VAL PER CAP: Assessed valuation per capita. The assessed valuation of the area served per capita, in dollars. (TAPE, CENSUS, ISL)

OPER EXP PER CAP: Operating expenditures per capita. Total operating expenditures per capita, in dollars. (CENSUS, ISL)

% WAGES: Percentage of wages. Operating expenditures for wages, salaries and fringe benefits for paid staff, not including building maintenance staff, as a percentage of total operating expenditures. Libraries with all-volunteer staffs are included in figuring system and population group averages.

% LIB MAT: Percentage of library materials. Expenditures for library materials as a percentage of total operating expenditures.

MAT EXP PER CAP: Materials expenditure per capita. Expenditures per capita for library materials, in dollars. (CENSUS, ISL)

% OTHER: Percentage of other. Operating expenditures, other than expenditures for wages and library materials, as a percentage of total operating expenditures. This includes wages and fringe benefits for building maintenance staff, capital outlay, and other miscellaneous expenses.

SAL HEAD LIBR: Salary of head librarian. Annual salary of the head librarian, as of the last day of the FY 1988/89. When an hourly wage was reported rather than an annual salary, the annual salary was calculated by multiplying the hourly wage times the number of hours worked per week times 52.

III. PUBLIC LIBRARIES GROUPED BY SYSTEM

As discussed in the introduction to Section 2, statistics provide useful descriptions of groups of libraries. In the tables in this section, libraries are grouped by their membership in one of Illinois' 18 multi-type library systems.

For each system, there are three tables:

A. Averages and Percentiles of Statistics of Public Libraries Belonging to a Specific Library System
B. Ratios and Percentages Derived from Statistics of Public Libraries Belonging to a Specific Library System
C. Ratios and Percentages Derived from Statistics of Public Libraries Belonging to a Specific Library System

The statistics presented in Table A in summary form are derived from the data in Section 1. Tables B and C in this section make extensive use of ratios and percentages. Ratios combine two of the basic statistics, such as the number of circulation transactions per capita. A library might have 10.4 circulation transactions per person, based on population served. Percentages look at one statistic as a percentage of another, such as adult circulation as a percentage of total circulation. A library may have an adult circulation that accounts for 62% of total circulation.

The charts provide a visual comparison of selected items across the different systems. Comparisons among different systems can suggest general trends as well as differences among the various systems. In addition to the charts given here, figures from the summaries of basic statistics tables and the summaries of ratios and percentages tables can used for comparison among the systems.

DEFINITIONS

The following data are provided in summary form (Table A) for each system. The source of the data, unless otherwise indicated, is the 1988-89 Illinois Public Library Annual Report form. Other sources of data include the 1980 Census (CENSUS), the 1987 Illinois Department of Revenue tax information tape (TAPE), and the Illinois State Library (ISL). The definitions for the variables are listed in the order of appearance in the table.

POPULATION SERVED: The population according to the 1980 (or later special) Census for all but district libraries. The latter provided population figures for their service areas. (CENSUS, ISL)

NONRESIDENT FEE: The nonresident fee shown is the fee charged per family per year for use of the library. Exceptions are indicated by a footnote.

HOURS OPEN PER WEEK: The number of hours the central library was open during a typical week in October 1988.

TOTAL TRANSACTIONS: The total direct circulation of all materials to library users. This figure includes both interlibrary loans received from other libraries and reciprocal borrowing.

TOTAL STAFF IN FTE: Full-Time Equivalence is figured on the basis of a 40-hour week. Included in this figure are professional staff, technical and clerical employees, and pages. Excluded from this figure are maintenance staff, persons not paid by the library, and vacant positions.

BOOK STOCK ADDED: Total number of book volumes added.

BOOK STOCK HELD: Total number of book volumes held at the end of the year.

PERIODICAL TITLES CURRENTLY RECEIVED: Number of periodical titles currently received.

EQUALIZED ASSESSED VALUATION: Equalized assessed valuation is the figure of real property reported in thousands of dollars. Information is taken from the abstracts on file with the Illinois Department of Revenue for the 1987 assessment year. For public libraries whose service area is in more than one county, a separate assessment and tax rate is shown for each county. (TAPE)

LOCAL GOVERNMENT RECEIPTS: The amount of revenue received by the library from local government sources during the fiscal year. This amount does not include a working balance from the previous year, income from tax anticipation warrants, revenue sharing, proceeds of a bond issue, or the monetary value of services provided free by the local government (e.g., audit tax, social security tax, and working cash fund tax). This figure includes income for the year in which the money is received.

TOTAL RECEIPTS: The total amount of money received by the library from all sources during the fiscal year, including state aid, revenue sharing, receipts for capital expenditures, gifts, etc. This does not include the working balance from the previous year, income from tax anticipation warrants, or the monetary value of services provided by the local government. Excluded from this figure is income (e.g., endowment monies) given directly to the Friends of the Library group instead of the library.

EXPENDITURES FOR WAGES AND SALARIES: Included in this figure are wages and salaries paid to all staff except maintenance personnel and fringe benefits such as the library's contribution for insurance, social security, and the Illinois Municipal Retirement Fund.

LIBRARY MATERIALS EXPENDITURES: Expenditures for all library materials.

OTHER OPERATING EXPENDITURES: Operating expenditures, other than expenditures for wages and library materials, as a percentage of total operating expenditures. This includes wages and fringe benefits for building maintenance staff, capital outlay, and other miscellaneous expenses.

TOTAL EXPENDITURES: Total operating expenditures plus capital outlay (for sites, buildings, construction or remodeling, and purchase of vehicles and other major fixed assets) and debt retirement.

The following list of definitions includes the variables listed in Table B and C for all systems but the Chicago Library System.

TRAN PER FTE: Transactions per paid full-time equivalent staff. The number of circulation transactions per paid, full-time equivalent staff, excluding building maintenance staff, based on a 40-hour work week.

TRAN PER CAP: Transactions per capita. The number of circulation transactions per capita for the population served. (CENSUS, ISL)

TRAN PER ITEM HELD: Transactions per item held. The number of circulation transactions per item in the collection, including books, films, video materials and audio recordings.

TRAN PER HOUR OPEN: Transactions per hour open. The number of circulation transactions per hour the central library was open. This is found by dividing the total number of circulation transactions for the year by 52 times the number of hours open during a typical week in October 1987.

% ADULT TRAN: Percentage of adult transactions. This is the circulation of adult materials as a percentage of the total circulation.

FTE PER 1000 POP: Full-time equivalent per 1,000 population. The number of full-time equivalent staff, excluding building maintenance staff, per 1,000 population. Libraries with all-volunteer staffs are included in figuring system and population group averages. (CENSUS, ISL)

MLS % OF TOTAL STAFF: Master's in library science percentage of total staff. Hours per week worked by staff holding a library degree at the master's level as a percentage of total FTE hours per week, not including building maintenance staff.

VOLS ADDED PER CAP: Volumes added per capita. The number of book volumes added per capita. (CENSUS, ISL)

VOLS HELD PER CAP: Volumes held per capita. The number of book volumes held per capita. (CENSUS, ISL)

% VOLS ADDED: Percentage of volumes added. The number of book volumes added as a percentage of the number of book volumes held at the end of the year.

ASSD VAL PER CAP: Assessed valuation per capita. The assessed valuation of the area served per capita, in dollars. (TAPE, CENSUS, ISL)

OPER EXP PER CAP: Operating expenditures per capita. Total operating expenditures per capita, in dollars. (CENSUS, ISL)

% WAGES: Percentage of wages. Operating expenditures for wages, salaries and fringe benefits for paid staff, not including building maintenance staff, as a percentage of total operating expenditures. Libraries with all-volunteer staffs are included in figuring system and population group averages.

% LIB MAT: Percentage of library materials. Expenditures for library materials as a percentage of total operating expenditures.

MAT EXP PER CAP: Materials expenditure per capita. Expenditures per capita for library materials, in dollars. (CENSUS, ISL)

% OTHER: Percentage of other. Operating expenditures, other than expenditures for wages and library materials, as a percentage of total operating expenditures. This includes wages and fringe benefits for building maintenance staff, capital outlay, and other miscellaneous expenses.

SAL HEAD LIBR: Salary of head librarian. Annual salary of the head librarian, as of the last day of the FY 1988/89. When an hourly wage was reported rather than an annual salary, the annual salary was calculated by multiplying the hourly wage times the number of hours worked per week times 52.

ILLINOIS STATE LIBRARY, SPRINGFIELD, IL 62756
PUBLIC LIBRARY ANNUAL REPORT
1988-1989

Every public library in Illinois is required by law (Chapter 81, Sec. 4-10, and elsewhere in the ***Illinois Revised Statutes***) to file this annual report with the State Library. The purpose of this report is to obtain and publish data on the resources and services of all Illinois public libraries for use by all concerned. Each library is asked to file this report with its system headquarters **AS SOON AS POSSIBLE UPON (AND BY NO LATER THAN 30 DAYS AFTER)** completion of its fiscal year ending between July 1, 1988, and June 30, 1989. Please complete and return this form promptly. (By law, public library districts have until Oct. 1 to file this report, however it would be appreciated if the form is filed by Aug. 1.) Every public library district should send the State Library a copy of the certified audit of its accounts within 6 months of the close of the fiscal year. That document can be sent to the State Library later.

Please do **not** leave any item blank. Enter "0" if the appropriate entry for an item is zero or "none." Enter "N.A." if an item does not apply to your library. If an exact figure is not available for a particular item, but it is known that the amount is greater than zero, enter an estimate of the amount. Type your responses or print in black ink. To help prevent mistakes in assembling photocopies of several different libraries' reports, please write the name of your library in the line provided in the right hand margin of pages 2-6.
